

ADPICS DIRECT VOUCHER

Direct Voucher update is scheduled to move into production Tuesday, November 28, 1995. The functionality remains the same and requires no new action by the user.

The Direct Voucher screen PCHL 1800 no longer has the function key F7 "SEL VEND". F7 has been replaced with the function key F2 "Select". This will allow the user to select a vendor when the cursor is positioned in the "Vendor ID" field. F2 "Select" will also allow the user to select any other appropriate tableized field when the cursor is positioned in that specific field.

The Direct Voucher Screen PCHL 1810 (accounting version) has been renumbered to PCHL 1809. The Direct Voucher specification version is still 1810. The user is directly taken to the correct screen which is determined by the "DMI" (Distribution Method Indicator of either `S'ingle or `M'ultiple).
